

CASE STUDY: J. Grashof Personal Farm

Bowen, Alberta

Perfect for New Businesses

Executive Summary

As the customer was just starting out with a new business, he sought a low-cost structure to be used as a livestock shelter. He struggled to find a suitable option, that was able to give him the flexibility of open sides (for venting), and a custom ridge vent. Thereafter, he needed a structure that would help him save on energy costs over time, while being able to work inside of it year round.

Located in Bowen, Alberta, J. Grashof's personal farm houses sheep and other livestock. In 2016, Grashof was just starting out, and years later, his structure and his business are both still standing.

Project Profile

Size:

42' x 72' CC Series with 16' centres

Site Parameters:

42 psf snow load & 58 mph wind speed

Fabric:

Custom White non-FR fabric with Green non-FR trim

Mount:

Wood Post

Calhoun's Solution

Calhoun offered the customer his dream structure, while making it easy for him to install it himself. We further offered him the ability to dismantle and re-assemble in the future, which helped save him more money in the long-run. Moreover, with 80% light transfer due to Calhoun's fabric, he was able to save on energy costs. Calhoun was able to deliver a customized solution to all of his needs, while remaining cost-effective.

Additional Information:

One end closed; one end door opening. Main building includes open ridge down the length.

"Calhoun's buildings are very cost effective and were able to include a ridge vent in the fabric, which was a priority for me and my livestock."
-J. Grashof, Bowen, Alberta
