

Elite Fabric

VS

Traditional Fabric

## Stronger. Smarter. Built to Last.

The ELITE fabric's enhanced durability and longevity come from a UV coating that extends its lifespan by up to 10 years. Similar to how roof shingles degrade under sunlight, fabric naturally wears down from prolonged UV exposure, but the extra ELITE film layer combats weathering by sealing the fabric's pores, forming a strong, UV-resistant barrier.

### Abrasion Resistance

✓ 13x greater than traditional fabric - protects membrane exterior from environmental elements

✓ Basic resistance to environmental elements

### Flex/Crack Resistance

✓ 3x greater than traditional fabric

✓ Standard environmental durability

### Warranty Coverage

✓ 25-year coverage

✓ 15-year coverage

### UV Surface Integrity

✓ Looks newer, longer

✗ Turns dull with prolonged UV exposure

### Cleaning Frequency

✓ Easy to clean over the fabric structure lifespan

✗ May need to be cleaned more frequently as the fabric ages

### Colour Options

✗ White (FR) and (Non-FR) available

✓ White, Silver, Tan, Blue (FR)  
White, Green, Blue, Red, Tan, Silver, and Brown (Non-FR)

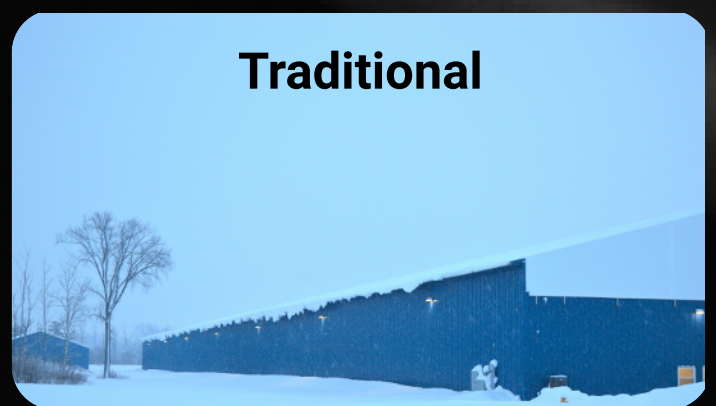

### Cost-Effectiveness

✓ Average <1% increase in total cost

✓ Affordable base cost

Elite

Traditional

## Built to Withstand a Buffalo Snowstorm

In real-world testing with 6 ft / 1.82 m of snow, Elite fabric (left) demonstrated exceptional performance — snow shed cleanly off the structure, instead of accumulating.

For a **marginal cost increase averaging less than 1% per project**, Elite delivers long-term value. Cleaner, stronger, and longer lasting—the choice is clear.

**OUR STRENGTH IS IN OUR STRUCTURE.**
