

CASE STUDY

# PINNACLE AGRICULTURE

## THE CUSTOMER

Pinnacle Agriculture is a leading agricultural retail and wholesale distribution business, offering agriculture technology and farm supply across 27 states.

## THE CUSTOMER

### Size:

130' x 188' VP Series on 10'/12' centres

### Site Parameters:

40 psf snow load & 90 mph winds

### Fabric:

White non-FR Keder Panel design

### Mount:

Custom 25'7" steel leg

### Additional Features:

Both ends enclosed with an interior fill conveyor system, concrete storage bins, and blending system.

# CALHOUN

## THE CHALLENGE

High-quality fertilizer blends for agriculture have become an in-demand commodity in Highmore, South Dakota. Pinnacle Agriculture needed a quality building solution that could go up quickly during the winter months to meet this growing need. By getting the facility up and running in the off-season, Pinnacle wanted to start blending fertilizer in the spring in preparation for the busy summer months.

## THE SOLUTION

Calhoun Super Structure, in partnership with Greystone Construction, took on the project and constructed an ideal solution according to Pinnacle's specifications. Construction of the **130 x 188 VP Series building** started in January and was complete by March.

Read more about the project in the July 2016 issue of **CropLife Facilities Report**.
