

“The warehouse facility located at 4543 Walden Ave can be considered a highly performing warehouse”

Warehouse Storage Building Reduces Energy Usage by 90%

Hybrid Building Solutions completed construction of the Robert-James Sales, Inc. Warehouse in Lancaster, NY in 2020. Besides the huge cost savings in construction and clear span interior, the installation time is a fraction of traditional warehouse buildings. Furthermore, after an independent utility and energy benchmarking analysis was performed – it was determined that **this building uses 90% less energy than the average warehouse in the Mid-Atlantic region.** The natural light from this Calhoun fabric structure helped make this possible.

Energy Highlights

ENERGY STAR Score:	98
Energy Usage:	0.45 kWh/sqft
Avg. Warehouse Energy Usage:	6.10 kWh/sqft
Energy Savings:	5.65 kWh/sqft
